The **World's Only Fanless modular power supply**, the CoolX600 NFF Series is the revolutionary new Convection-Cooled modular power supply from Excelsys. It provides an incredible 600W in a compact 4.5 x 8.5 x 1U package with no fan.

The silent CoolX600 generates no acoustic noise and offers system designers best in class performance in efficiency (>93%) and unrivalled reliability in addition to the most comprehensive feature set and specifications.

The series comprises two base models. The CX06S is certified to IEC60950 2nd edition for industrial applications whereas the CX06M carries IEC60601-1 3rd edition & IEC60601-1-2 4th edition (EMC) for medical applications. The CoolX600 can be populated with up to 4 CoolMods, providing up to 4 isolated DC outputs ranging from 2.5V to 58.0V. Continuing the Excelsys tradition of flexibility, the CoolX600 is completely user and field configurable. Outputs can be adjusted to the required set point voltages and can be configured in parallel or series for higher current and/or higher voltages. CoolPacs can be paralleled for higher power and N+1 Redundancy applications.

Stand-out features for medical applications include BF rating (Body Floating), input dual fusing, 2 x MOPP isolation and <300uA leakage current. Other features include 4KV input surge immunity, SEMI F47 compliance, MIL810G compliance and the ability to withstand input voltages of up to 300VAC making it ideal for use in remote locations and those subject to input voltage disturbances. No fans make it ideal for acoustic and vibration sensitive applications.

With Digital Communications available, the CoolX600 provides the most flexible, highest specification modular power supply in the market, all backed up by the Excelsys 5 Year Warranty ensuring quality and the lowest total cost of ownership
