

Code of Ethics

09/2019

Opening Remarks

Horizon Electronics Ltd. believes in integrity, fairness, and taking responsibility towards its employees, customers, suppliers, shareholders, and competitors. Each of our employees is responsible to uphold the law and the highest ethical standards.

Horizon Electronics Ltd. chose to define an ethical code that delineates the standards to which each and every employee, including management, is held. This code does not cover (nor could it cover) each and every possible issue that may arise. Rather, it provides guidance to a set of principles we are all obligated to follow.

We expect from each company employee and organization that works with Horizon to always act according to this code.

For any question on any subject matter regarding acting to code, legality of an action, or its fairness, you may come to company management or to the company's legal counsel (Mr. Elad Elazar, Miron, Bension & Prywes, Advocates and Notaries).

The ethical code shall be presented to all employees from time to time, as a refresher. It is our hope and expectation that each of our employees understands what is behind this code and to add any detail that they see where it is proper to do so.
