FANLESS, INTELLIGENT 1000 W MODULAR POWER SUPPLIES

Advanced Energy's CoolX<sup>®</sup>1000 series, part of our low voltage solutions, is the world's only fanless 1000 W modular power supply. Packaged in a compact 254 mm x 165.1 mm x 39.1 (10 in x 6.5 in x 1U) U-channel design, the CoolX1000 provides up to 1000 W without any requirement for fan or base plate cooling, eliminating acoustic noise detrimental to scientific and medical applications, as well as applications sensitive to vibration or where fan cooling is not available. The CoolX1000 also offers increased flexibility by allowing system designers to monitor and control power supply performance — essential for staving off process disruption — using either analog or digital communications (PMBus<sup>™</sup>).
